

Gentlemen: My wife and I have found an almost 89% reduction in junk calls invading our home at inopportune times. We thgought this was the national standard and wanted to thank Congress and the FCC for the plan which truly works.

Now I have learned that our publicly beneficial program is less tough in states other than New Jersey and the FCC wants to force New jERSEY TO CONFORM TO THE LESS STRINGENT NATIONAL PROGRAM.

Please, please done destroy the renewed phone privacy we have recently gained.
